

European Working Group on Drugs Oriented Research

European Working Group on Drugs Oriented Research

EWODOR was founded in 1983 to provide a forum within which researchers in the field of drug/alcohol treatment, prevention and policy could share research experience and expertise; compare procedures, methods and results; and subject their work to peer examination.

In order to achieve this objective, EWODOR provides:

- **symposia for the presentation of current/recent research in the drug/alcohol field**
- **an on-line discussion site for the exchange of information and the archiving of recent/current research findings in the drug/alcohol field**
- **a means by which researchers in the drug/alcohol field can communicate with European and international bodies representing other relevant disciplines**
- **a forum where researchers and other practitioners in the drug/alcohol field can strengthen the multidisciplinary nature of their work and ensure its relevance**
- **an opportunity for researchers in the drug/alcohol field to propose new lines of action and investigation**

Join the EWODOR discussion group now. Joining the list is free and provides you with the capacity to contact over 100 European addiction researchers with 1 e-mail!!

The list is useful for:

- keeping in contact with friends & colleagues**
- discussing issues**
- announcing conferences, events, job vacancies etc.**
- asking for information & advice**
- proposing new lines of research**
- informing colleague of relevant research calls**
